

Metal distributor leader realizes thousands in ongoing technology expense savings

SpyGlass SnapShot Audit helps a national metal distributor gain control over their tech service costs.

ABOUT THE CLIENT

Coast Aluminum and Architectural is a national metal distributor of aluminum, brass, copper and stainless steel. With 15 locations throughout the U.S. and Mexico, Coast Aluminum has over 300 employees with annual revenue over \$163 million.

The Coast Aluminum IT team is responsible for implementing and managing the complex company-wide telecom and technology services structure. Managing multiple services from numerous vendors with different billing methodologies made it difficult for the controller or those in the accounting department to make comparisons on costs from month-to-month.

THE CHALLENGES

Recognizing the complexity of their overall technology service cost management picture, the controller and IT team contacted SpyGlass — not once but twice — to address ongoing tech service cost issues:

- Difficulty with cross-vendor analysis
- Multiple invoice types and billing methodologies
- Excessive unnecessary network feature charges
- Antiquated fixed-line services
- Forgotten phone lines after a tech upgrade
- Unchecked mobility and wireless inventory, services and costs

THE STRATEGY

To thoroughly understand Coast Aluminum’s telecom and technology services network, SnapShot Audit experts analyzed:

Land Services

- Unused lines
- Excess features
- Redundant services
- Billing errors
- Outdated pricing

Wireless Services

- Unused phones
- Unused hot spots
- Wireless inventory
- Excessive fees

OUR TECHNOLOGY EXPENSE MANAGEMENT SOLUTION: SpyGlass SnapShot Audit

ANALYZE

Tech service costs across voice, data, internet, cloud services, SaaS license and mobility

IDENTIFY

Savings recommendations for streamlined services

OPTIMIZE

Existing services by implementing approved recommendation for savings

THE RESULTS
